

MEET BARVALIYA

FULL-STACK DEVELOPER

Ahmedabad, Gujarat | +91-9016952839 | barvaliyameet@gmail.com | [linkedin.com/in/barvaliyameet](https://www.linkedin.com/in/barvaliyameet) | github.com/Meet-ops

PROFESSIONAL SUMMARY

Motivated B.Tech Information Technology student (CGPA 9.34/10) with hands-on expertise in the MERN and PERN stacks, building full-stack applications end to end. Experienced in developing secure, production-ready backend systems — RESTful APIs, JWT authentication, real-time communication (Socket.IO), and AI-model integrations (Google Gemini) — alongside responsive front-end interfaces. Seeking a Developer role where I can apply and grow these full-stack engineering skills on real production systems.

TECHNICAL SKILLS

Languages: JavaScript, HTML5, CSS3

Frontend: React.js, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, REST APIs, Socket.IO, Gemini API

Databases: MongoDB, Mongoose, PostgreSQL

Tools & Platforms: Git, GitHub, Postman, VS Code, npm

Core CS / DSA: Arrays, Linked Lists, Recursion, Searching, Sorting

EDUCATION

B.Tech — Information Technology

Expected May 2027

Silver Oak University, Ahmedabad, Gujarat

CGPA: 9.34 / 10

PROJECTS

AI Kanban Board — Real-Time Full-Stack Project Management Platform

Backend Developer • **IN PROGRESS** • PERN (PostgreSQL, Express, React, Node.js) • Socket.IO • Google Gemini AI • Tailwind CSS v4

- Developing backend REST APIs (Node.js, Express, PostgreSQL) for a full-stack, real-time AI-powered Kanban board supporting team-based project management.
- Integrating Google Gemini AI to convert a one-line goal into a fully prioritized backlog, automatically break large tasks into subtasks, and generate sprint progress summaries.
- Implementing real-time collaboration on the backend using Socket.IO — live drag-and-drop state sync, user presence tracking, and instant board updates across all connected clients.
- Designing the PostgreSQL schema and API layer to model boards, tasks, subtasks, and sprints, ensuring consistent state across concurrent multi-user sessions.

Morph Resume — ATS Score & Optimization Platform

github.com/Meet-ops/Morph-Resume

Backend Developer • MERN • Google Gemini 2.5 Flash • Tailwind CSS • shadcn/ui

- Built backend REST APIs (Node.js, Express) handling resume upload and parsing, ATS scoring, and resume version history for an AI-powered resume optimization platform.
- Integrated the Google Gemini 2.5 Flash model to analyze parsed resume content and generate an ATS (Applicant Tracking System) compatibility score.
- Developed an AI-driven suggestion engine that detects generic/basic wording in a resume and recommends professional, industry-relevant terminology to improve ATS keyword matching.
- Designed endpoints to store and retrieve resume version history, allowing users to track and compare changes across iterations.

StayZy — Full-Stack Accommodation Platform

github.com/Meet-ops/StayZy

Full-Stack Developer (frontend & backend) • MongoDB • Express.js • Node.js • EJS • Cloudinary • Mapbox GL JS

- Designed and built a full-stack rental listing platform end to end — both frontend (EJS templating, responsive UI) and backend (Node.js, Express, MongoDB) — with full CRUD functionality, JWT-based authentication, and protected routes for secure user registration and login.
- Integrated Cloudinary for cloud-based image storage, Mapbox GL JS for interactive location maps, and a review/rating system for listings.
- Implemented centralized Express error-handling middleware and async wrapper utilities for robust, consistent API failure recovery.

ACHIEVEMENTS & POSITIONS OF RESPONSIBILITY

- Academic Excellence — Maintained a CGPA of 9.34/10 across semesters at Silver Oak University, consistently ranking among top performers in the IT department.
- Full-Stack Development Coursework (Udemy) — Completed a comprehensive course covering frontend, backend, databases, and deployment, applying learnings directly to real-world projects.
- Sigma 4.0 Program (Apna College) — Enrolled in an intensive full-stack + DSA + aptitude program, strengthening problem-solving alongside full-stack engineering skills.
